Re: Skinner Landfill in West Chester, Ohio

Dear Craig:

Attached for your files is a redacted copy of the pertinent page from the Final Allocation Report and Recommendations concerning Sealy, Inc., as you requested. As I mentioned in my voicemail message, the Allocator's percentage assigned to Sealy, Inc. (1.4079%) is the percentage of volume attributed to generators. Generators as a whole were allocated 10% of total site liability. Therefore, the Allocator assigned 0.14079% of the total site liability to Sealy, Inc. Please call or email me if you have any questions or comments.

Very truly yours,

John A. Heer
